

KISHORE A

+91 9066324749 | kishorea0323@gmail.com | linkedin.com/in/kishoreagi

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML/CSS, SQL

Frameworks: Spring (Boot, MVC, AI, Cloud, Data JPA, Security, Batch), Hibernate, Angular, Bootstrap, JUnit, Mockito

Databases/Middleware: OracleDB, MySQL, MongoDB, Elasticsearch, Redis, Kafka, RabbitMQ

Cloud/Devops: AWS, OCI, CI/CD, Docker, Kubernetes, Linux, Jenkins, Maven, Gradle, Apache Tomcat

Developer Tools: VS Code, Eclipse, IntelliJ IDEA, Git, Github Copilot, Claude Code, Codex

EXPERIENCE

Oracle | *Senior Member of Technical Staff*

July 2022 – Sept 2025

- Optimized a Translation-as-a-Service data pipeline using Kafka Streams, resolving critical memory bottlenecks to increase processing throughput 6x and decrease peak-load system congestion by 24%.
- Reduced recurring production incidents by 40% by leading root-cause analysis on Translation REST APIs and correlating distributed logs across microservices to ship permanent hotfixes
- Architected and delivered a high-performance RBAC-based Analytics and Insights module, enabling real-time data visualization and representation of application usage and metrics to drive data-backed stakeholder decisions
- Automated translation storage cleanup for deprecated products by implementing a 3-month retention policy alongside a customizable file-keeping feature which reduced data size by 60%

LTIMindtree | *Senior Product Engineer*

Nov 2020 – June 2022

- Implemented native querying of the Dremio, Snowflake data for the faster delivery of the solution on the Fosfor platform
- Integrated AWS S3 data source with Dremio data warehouse for ease of access to customer data in product from different sources and developed RESTful API for data ingestion and analytics
- Developed and maintained Java Maven Packages to support authentication, event logging, configuration & secrets management (with Hashicorp Vault, AWS Secrets Manager or Kubernetes Secrets) used across microservices.

Regalix | *Software Developer*

Sept 2018 – Nov 2020

- Designed and developed microservices based innovative proactive support platform for VMware Skyline using Java, Spring Boot, Web, Cloud, Batch, MongoDB, Angular, CI/CD, deployed on Pivotal Cloud Foundry (PCF) platform
- Engineered real-time Sales/Marketing analytics dashboards using AWS Redshift, S3, and Data Pipeline, cutting reporting latency by 70%, and architected an AWS serverless application integrating Salesforce FSL with Twilio to automate customer support communication, reducing manual effort for EagleView
- Designed and developed AWS Serverless application for EagleView that integrates Salesforce FSL with Twilio services
- Developed ETL application to transform and migrate the data from OrientDB to MongoDB

Techurate | *Software Developer*

Jan 2017 – Sept 2018

- Worked on migration of the monolithic application into microservices architecture by breaking down spring mvc application into SpringBoot microservices modules based on domain driven design
- Implemented payment and account services for NBS and NFC banks using Java, SpringBoot, REST, SOAP, and OracleDB by integrating with Flexcube core banking services to handle secure retail and corporate payment transactions

PROJECTS

Global Automation Technology | *Java, Oracle Cloud, SpringBoot, Kafka, OracleDB, OpenSearch, Gradle, Kubernetes*

- Architected 2 core features, implemented 10+ microservices, resolved 50+ critical product bugs and developed 40+ REST APIs to enhance application scalability and system performance.
- Optimized operational costs in Oracle Cloud, by achieving 40% cost savings through kubernetes HPA dynamic scaling, kubernetes autoscaling nodes and reserved labelled node pool clusters by reducing P99 latency by 78%
- Providing R&D inputs for the product functional roadmap by architecting and developing the POC from leading the gathering of functional requirements and developing the technical specifications

Lumin | *Java, SpringBoot, MongoDB, MySQL, RabbitMQ, Maven, AWS, Microservices, Kubernetes, Redis, Elasticsearch*

- Implemented product features for data ingestion, representation, processing, user accessibility, analytics
- Fixed 40+ bugs from old codebase by analyzing the issues, tracing server logs and debugging
- Pioneered adoption of Agile methodology to release features on Lumin like data summarizations, correlations, forecasting, regression-based simulation, deep-dive diagnostics, and anomaly detection
- Reduced data processing times 20-fold by parallelizing Spring batch jobs

CERTIFICATION AND EDUCATION

Java/JEE and Testing | *Aradhya's Brilliance Center Certified (Nasscom Member)*

July 2016 – Dec 2016

Visvesvaraya Technological University | *Bachelor of Engineering in Computer Science*

Sept 2012 – June 2016
